

STATE OF CALIFORNIA  
THE RESOURCES AGENCY  
STATE WATER RESOURCES CONTROL BOARD  
DIVISION OF WATER RIGHTS

## License for Diversion and Use of Water

APPLICATION 24682

PERMIT 17207

LICENSE 11310

**THIS IS TO CERTIFY, That**

Robert E. Stevens and Barbara J. Stevens  
9970 Franz Valley School Road, Calistoga, California 94515

have made proof as of June 24, 1982 (the date of inspection)  
to the satisfaction of the State Water Resources Control Board of a right to the use of the water of  
An Unnamed Stream in Sonoma County

tributary to Franz Creek thence Maacama Creek thence Russian River

for the purpose of Stockwatering, Recreational and Incidental Domestic uses  
under Permit 17207 of the Board and that the right to the use of this water has been perfected  
in accordance with the laws of California, the Regulations of the Board and the permit terms; that the  
priority of this right dates from August 29, 1974 and that the amount of water to which  
this right is entitled and hereby confirmed is limited to the amount actually beneficially used for the stated  
purposes and shall not exceed Fifteen (15) acre-feet per annum to be collected from  
October 1 to December 1 and February 1 to May 15 of each year.

This license does not authorize collection of water to storage outside of  
the specified season to offset evaporation and seepage losses or for any other  
purpose.

After the initial filling of the reservoir, licensee's right under this  
license extends only to water necessary to keep the storage reservoir full by  
replacing water beneficially used and water lost by evaporation and seepage,  
and to refill if emptied for necessary maintenance or repair.

**THE POINT OF DIVERSION OF SUCH WATER IS LOCATED:**

North 2,000 feet and West 2,400 feet from SE corner of Section 33, T9N, R7W,  
MDB&M, being within NW $\frac{1}{4}$  of SE $\frac{1}{4}$  of said Section 33.

**A DESCRIPTION OF THE LANDS OR THE PLACE WHERE  
SUCH WATER IS PUT TO BENEFICIAL USE IS AS FOLLOWS:**

At reservoir within NW $\frac{1}{4}$  of SE $\frac{1}{4}$  of Section 33, T9N, R7W, MDB&M, as shown on map  
on file with State Water Resources Control Board.

The quantity of water diverted under this license is subject to  
modification by the State Water Resources Control Board if, after notice to the  
licensee and an opportunity for hearing, the Board finds that such modification  
is necessary to meet water quality objectives in water quality control plans  
which have been or hereafter may be established or modified pursuant to  
Division 7 of the Water Code. No action will be taken pursuant to this  
paragraph unless the Board finds that (1) adequate waste discharge requirements  
have been prescribed and are in effect with respect to all waste discharges  
which have any substantial effect upon water quality in the area involved, and  
(2) the water quality objectives cannot be achieved solely through the control  
of waste discharges.

This license is subject to the continuing authority of the State Water Resources Control Board to reduce the amount of water named in the license upon a finding by the Board that the amount is in excess of that reasonably needed to be held in storage for the authorized uses. No action will be taken by the Board without prior notice to the owner and an opportunity for hearing.

*Licensee shall allow representatives of the Board and other parties, as may be authorized from time to time by the Board, reasonable access to project works to determine compliance with the terms of this license.*

*Pursuant to California Water Code Sections 100 and 275, all rights and privileges under this license, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.*

*This continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this license with a view to minimizing waste of water and to meeting the reasonable water requirements of licensee without unreasonable draft on the source. Licensee may be required to implement such programs as (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this license and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.*

*Reports shall be filed promptly by licensee on appropriate forms which will be provided for the purpose from time to time by the Board.*

*The right hereby confirmed to the diversion and use of water is restricted to the point or points of diversion herein specified and to the lands or place of use herein described.*

*This license is granted and licensee accepts all rights herein confirmed subject to the following provisions of the Water Code:*

Section 1625. Each license shall be in such form and contain such terms as may be prescribed by the Board.

Section 1626. All licenses shall be under the terms and conditions of this division (of the Water Code).

Section 1627. A license shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code) but no longer.

Section 1628. Every license shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a license is issued takes the license subject to the conditions therein expressed.

Section 1629. Every licensee, if he accepts a license does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any license granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any licensee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any licensee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

Section 1630. At any time after the expiration of twenty years after the granting of a license, the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State shall have the right to purchase the works and property occupied and used under the license and the works built or constructed for the enjoyment of the rights granted under the license.

Section 1631. In the event that the State, or any city, city and county, municipal water district, irrigation district, lighting district, or political subdivision of the State so desiring to purchase and the owner of the works and property cannot agree upon the purchase price, the price shall be determined in such manner as is now or may hereafter be provided by law for determining the value of property taken in eminent domain proceedings.
