**ORDER**

APPLICATION 21977

PERMIT 14763

LICENSE 9295

ORDER DELETING A PURPOSE OF USE,  
ADDING AN INCIDENTAL USE AND AMENDING THE LICENSE

WHEREAS:

1. License 9295 was issued to Edward J. Willig and was recorded with the County Recorder of Sonoma County on April 21, 1970 in Book 2456, Page 972.
2. License 9295 was subsequently assigned to Loren M. Berry.
3. A request for deletion of irrigation as a purpose of use, and deletion of 10 acres of pasture land from the place of use has been received from the licensee. The State Water Resources Control Board has determined that good cause for such deletions has been shown.
4. The licensee has requested that Fire Protection use be added to the licensee pursuant to Section 798, Title 23 of the California Code of Regulations.
5. The Board has determined that the changes do not constitute the initiation of a new right nor operate to the injury of any other lawful user of water.
6. The license condition pertaining to the continuing authority of the Board should be updated to conform to Standard Term 12 as contained in Section 780(a), Title 23 of the California Code of Regulations.

NOW, THEREFORE, IT IS ORDERED THAT:

1. The condition of this license regarding purposes of use is amended to read:

Recreation and Fire Protection uses.

(0000003)

2. The condition of this license regarding the place of use is amended as follows:

At the reservoir, within the SE $\frac{1}{4}$  of NW $\frac{1}{4}$  of Section 17, T7N, R11W, MDB&M.

(0000004)

3. Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this license including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this license with a view to eliminating waste of water and to meeting the reasonable water requirements of licensee without unreasonable draft on the source. Licensee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the licensee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.
